SREE NANDHANA

Cloud & DevOps Engineer (Fresher)

Kochi, Kerala, India | nandhanagaldon@gmail.com | Phone: 6235024720 | linkedin.com/in/sree-nandhana-90490a3b6

PROFESSIONAL SUMMARY

Motivated BCA graduate pursuing an MCA with Cloud and DevOps Engineering training at IPSR. Foundational knowledge of Linux system administration (Ubuntu, RHEL), AWS, Microsoft Azure, and Ansible automation, plus experience building a full-stack application using Flutter, Python, and MySQL. Seeking an entry-level Cloud, DevOps, or Linux Administrator role to apply hands-on skills and contribute to reliable, efficient IT infrastructure.

TECHNICAL SKILLS

Operating Systems:	Linux, Ubuntu, Red Hat Enterprise Linux (RHEL)
Cloud Platforms:	AWS, Microsoft Azure
DevOps & Automation:	Ansible
Programming Languages:	Python, Java, C, Dart
Web Technologies:	HTML, CSS, JavaScript, Bootstrap
Databases:	MySQL
Frameworks:	Flutter
Environments:	Linux Lab Environment, Virtualization

EDUCATION

Master of Computer Applications (MCA) – Sree Narayana Open University
Cloud and DevOps Engineering - IPSR | Currently Pursuing

Bachelor of Computer Applications (BCA) 2023 – 2026
Morazha Arts and Science College, Kannur University

PROJECTS

Legal Advisor Management System June 2025 – February 2026
Tech Stack: Flutter, Python, Dart, MySQL

- Developed a centralized legal management system with three role-based modules: Admin, Advocate, and User.
- Implemented login and profile management for each user role to ensure secure access.
- Built case allocation and tracking features for pending, approved, and rejected cases.
- Integrated hearing date management, request status tracking, and daily and case report generation.
- Added advocate management and feedback and complaint handling features.
- Improved workflow efficiency and transparency in accessing legal information.

CERTIFICATIONS AND TRAINING

- Cloud and DevOps Engineering – IPSR (In Progress)
- Machine Learning with Python – IBM (February 2026)
- Foundations of Project Management – Google (February 2026)
- Foundations of Data Science – Google (February 2026)
- Introduction to Cybersecurity Careers – IBM (November 2025)
- Software Development Bootcamp – Upcode Software Labs (January 2025)
